```cpp
#include <iostream>
#include <string>
using namespace std;
int main()
{
    string firstname;
    string lastname;
    string middlename;

    cout << "Enter firstname: ";
    cin >> firstname;

    cout << "Enter middlename: ";
    cin >> middlename;

    cout << "Enter lastname: ";
    cin >> lastname;

    cout << firstname << " " << middlename << " " << lastname << endl;
}
```

```cpp
#include <iostream>
using namespace std;
int main()
{
    int b, c, d, e;
    double a;

    cout << "Enter a double: ";
    cin >> a;

    cout << "Enter an int: ";
    cin >> b;

    cout << "Enter an int: ";
    cin >> c;

    cout << "Enter an int: ";
    cin >> d;

    cout << "Enter an int: ";
    cin >> e;

    cout << "sum: " << a+b+c+d+e <<endl;
    cout << "difference: " << e-a << endl;
    cout << "sum of first and second: "<< a + b << endl;
}
```
